COMPANY PROFILE

Technology for electric motors

Cutting edge production technologies, continuous research of qualitatively advanced products and the collaboration of highly-trained staff make FVZ one of the most influential companies in the construction of machines for electric motors processing which stands out in the national and international market.

✓ Experience ✓ Quality ✓ Guarantee

FVZ was established in Parma on year **1976** as a Company who design and build automatic machines for the electric motor repair and assembly.

The validity and the perfect adaptability of our products, tested and improved over time, are used in various stages of construction of the electric motor, allow us to consolidate more and more on the National market.

At the same time, the advanced production technology, the continuous research of quality products and advanced collaboration of qualified staff, allowed us to enter in foreign markets, where the high production guarantees and more efficient product are the standard requirement.

Actually our production is dedicated for the 60 % to the Europe and Extra Europe Market, and the rest 40 % to the Italian Market.

FVZ it is also supported from other Company that work in accordance to our specifications and that are located in the Parma area as well.

FVZ can also count on the support of several Agent that are working in order to propose our product in other Country as France, Germany, Austria, England, Spain, East Europa, Turkey, Russia, China, Malaysia, Vietnam.
